Replacement lock for PVCu,
composite and timber doors

Yale[®] Doormaster[™]

Yale Doormaster™ Professional

Replacement lock for PVCu, composite and timber Doors

Yale Doormaster™ Professional is a High Security replacement lock with three hooks and two rollers. Designed with the professional installer in mind, this lock includes 'crop & mate' technology to maximise the scope of installation.

Several patented features plus a choice of faceplate widths and backset sizes, makes the Professional lock the ideal choice where a higher level of security is required.

Designed for Professionals

Yale Doormaster™ Professional makes replacing multipoint locks simple, and will replace any lock with top and bottom hooks or bolts, a 35m or 45mm backset, and a 16mm or 20mm faceplate.

Latest YS170 centre gearbox

The latest engineering from Yale, with optional split follower for nightlatch function.

Flexible 'crop & mate' design

Enables you to simply cut the lock to length and position gearboxes to match locks being replaced.

Fixing tabs

Make fitting easy and more secure.

Hook Bolts

3 Hook Bolts for High Security anti-separation.

1-piece Rollers

Easy to adjust to create a weather-tight seal. (Allen key included.)

16mm or 20mm faceplate options

Suitable for PVCu composite and timber doors.

35mm or 45mm backset options

Available in 35mm or 45mm backset options for maximum flexibility.

3 piece keep & Uni-packer™ System

All versions include a 3 piece keep, and for PVCu doors our patented Uni-packer™ system preassembled for fast, easy, and reliable installation.

Latch Easily Reversible

Makes this lock suitable for left or right-handed doors.

Central Hook

Provides protection against attack, preventing separation.

Secured by Design PAS 24 capable

Doormaster™ Professional has been tested to Police Approved Secured By Design standard and is PAS 24 door set capable.

Guaranteed peace of mind

Yale Doormaster™ Professional is backed by the reputation of Yale, the world's favourite lock since 1843 – and comes with a full 10 year guarantee.

Will Yale Doormaster™ Professional fit?

Yale Doormaster™ Professional has been designed to fit most PVCu, timber and composite doors with top and bottom hooks or deadbolts:

1. Measure the Backset

Measure the distance **A** between the centre of the cylinder and the metal faceplate of the lock (not the edge of the door).

Yale Doormaster™ Professional replacement locks come in 35mm and 45mm backsets – so if your existing lock is either of those backsets just choose the same size lock.

2. Measure the Centres

Measure the distance between the centre of the cylinder and the centre of the door handle.

B must be 92mm for Yale Doormaster™ Professional to fit the door.

Please note: If the handles inside and outside the door are at different heights, measure the centres on both. If either are 92mm you will be able to fit this lock, but will require new handles – see Yale Replacement PVCu Door Handles.

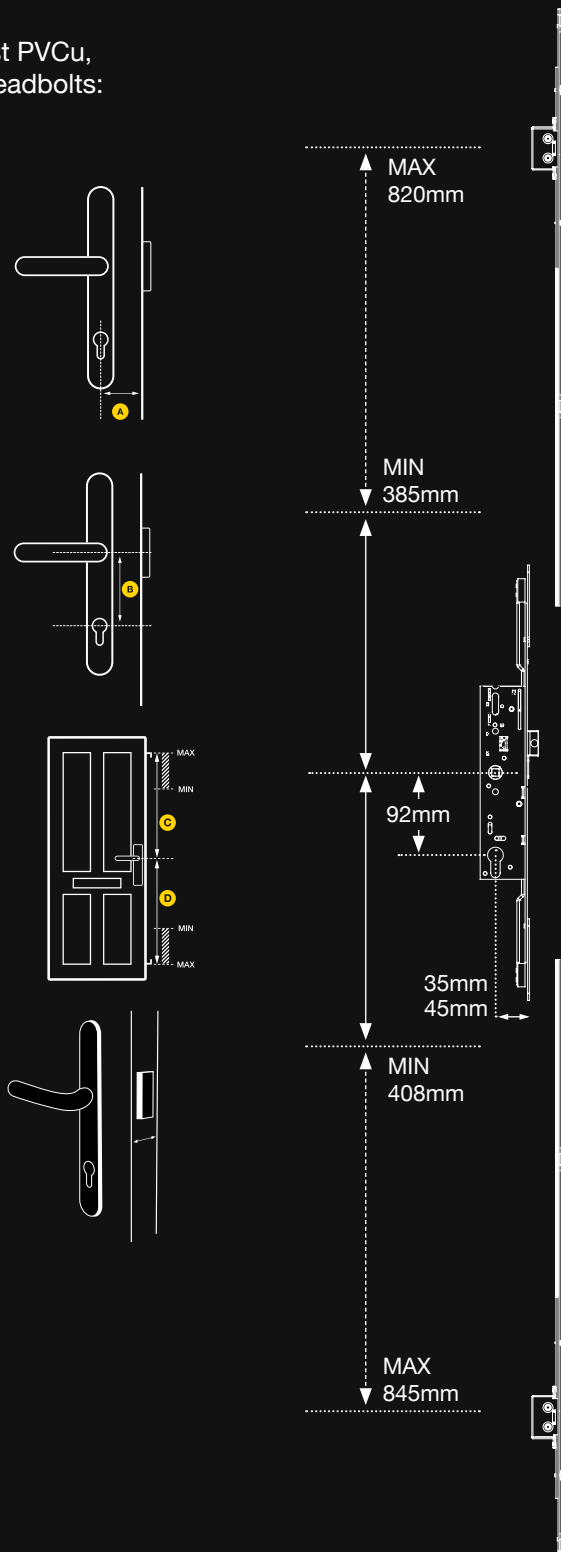

3. Measure the Reach

Measure the distance between the handle spindle and the top and bottom hook/bolts. To fit the door this must be:

- C** MIN 385mm and MAX 820mm and
- D** MIN 408mm and MAX 845mm

4. Measure the Faceplate

Measure the metal faceplate on the existing lock – this must be 16mm or 20mm for Yale Doormaster™ Professional to fit the door.
