**LOCKMASTER**  
**BRITAIN'S BEST SELLING**  
 multi-point door lock

**Yale** The world's favourite lock since 1843

Lockmaster is compatible with the Yale Keyfree, a family-friendly solution for the modern homeowner. Keyfree is a hi-tech, digital door lock, which combines security with convenience, allowing homeowners to access and protect their property without a key. Whether used with the remote control fob, very much like a car, or by entering a user defined 4 to 12 digit access code on the built-in keypad, operating the Keyfree couldn't be easier.

**World Class**

The Lockmaster range is produced in our state of the art manufacturing facility in the heart of the West Midlands, with all aspects of design, manufacturing, quality control and testing covered by our ISO9001:2008 accredited quality management systems.

**British Built**

Lockmaster production including metal pressing, Zinc alloy die casting and nylon injection moulding, as well as assembly, are carried out on site at our UK headquarters.

**Security**

Awarded the Police 'Secured by Design' accreditation, Lockmaster has been rigorously tested to the very highest security standards, ensuring home owners the very best protection against unauthorised and forced entry.

**Product Range**

Yale also supplies high security multi-point locking systems for casement windows, as well as a wide range of door handles, hinges and accessories, more details can be found on our web site.

- Illuminated keypad**  
Helps with operation in the dark.
- Remote locking**  
The remote keyfob works up to 10 metres away. Users can also create numerous 4 to 12 digit pin codes via a keypad.
- Backup**  
If backup power is required, the lock can be operated via a nine volt battery. Keyfree is also fitted with a mechanical lock and key as a safety over-ride feature.
- Simple Installation**  
Keyfree is designed to work with the latest multi-point locking technology from Yale. Keyfree needs no complicated wiring, just four AA batteries and Keyfree tells you when the batteries are running low.
- Double operation security**  
A push-button on handle must be pressed to operate from the inside.
- Tamper alarm**  
Keyfree has its own built-in 80 decibel alarm that will sound if the lock is attacked.

**LOCKMASTER®**  
**BRITAIN'S**  
**BEST SELLING**  
 multi-point door lock

Designed, developed and tested to deliver the very highest levels of performance for security, ease of use and service life, Lockmaster has established itself as the market leading multi-point door lock solution in the United Kingdom. Whether your doors are manufactured from PVCu, timber, aluminium or modern composite materials, there is a Lockmaster product perfectly suited to your needs.

**LOCKMASTER®**  
 Multi-point door locks

**LOCKMASTER®**  
 Striker sets

**Choice of locking points**

A range of locking points including Lockmaster's signature combined hook and pin unit, deadbolt or hook only, all of which are available with or without roller cams, to cover every application.

**'Quick change' reversible latch with 'snib' facility**

Handing of the lock can be changed simply in or out of situ. All dual follower locks have a handle driven 'snib' facility to prevent accidental lock outs.

**Choice of centre locking points**

Both single follower and dual follower Lockmasters are available with either deadbolt or anti-separation hook centre locking point.

**Shoot bolt locking†**

Enabling Lockmaster multi-point door locks to be used for French door and enhanced single door applications.

† Not available on all Lockmaster MPLs

**NHBC 'Secure Escape' approved**

'Custodian' variants of the Lockmaster multi-point locks are fitted with a cylinder operated independent locking point, ensuring acceptance on all new build developments.

**Dual and Single follower centre cases**

Dual follower centre cases offer front and back door applications in one lock; single follower locks cater for a wide range of handle options for lever/lever requirements.

**35mm/45mm back set options**

Covering the majority of all timber, PVCu, aluminium and composite door multi-point lock applications in the UK.

**Patented 'pre-compression' rollers**

Stainless steel roller cams engage into their keeps, compressing the door against the gasket, ahead of the locking points deploying.

**Single or multiple piece striker sets**

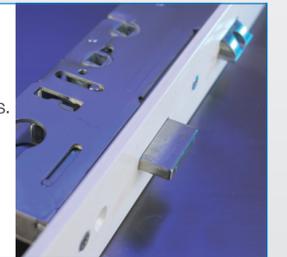

Satisfying aesthetic, technical and installation preferences, fully adjustable Lockmaster U-channel strikers are available in both one-piece and multiple-piece variants. Lockmaster's flexible and easy to use interchangeable packer solution allows strikers to be easily fitted to any PVCu profile.

**LOCKMASTER®**

**Wide faceplate locks for composite doors**

- Designed specifically for 44mm thick composite door slabs.
- Aluminium or PVCu faceplate available in White or Brown.
- Matching hinge plate with cut outs for Yale hinges.
- Wide range of striker options available.

**LOCKMASTER®**

**Multi-point panic door system**

- Fully compliant with EN1125:2008.
- Unique external access system.
- For use with outward opening single doors.
- Suitable for use in high frequency applications.
