

8K103 PVCu Window Stop Fitting Instructions

Tools Required

Drill

Drill Bits
Required:
Ø3mmPosidrive
Screwdriver

Where to fit

- Small window should have a window stop fitted centrally on the opening frame.
- Larger Windows should have window stop fitted top and bottom. Fix the window stop to the frame using screws provided. Fig1.

Fitting instructions

Prior to fitting your Window Stop, familiarise yourself with its simple action.

Caution: Before drilling or fitting screws, check position of glass, seals and any operating gear.

1. Close window and select position of the window stop on the outward opening frame.
2. Drill pilot holes using the window stop as a template. Drill through the frame and the inside wall of the frame. If you encounter a reinforced steel or aluminium section, drill through that section carefully so as not to touch the glass. Fix the window stop to the frame using screws provided. Fig2.
3. To ensure a tight fit select the correct size of button provided and fit underneath the lever, compress slightly, but not so much that it marks the PVCu frame. Fig3.
