

# Lockmaster 21

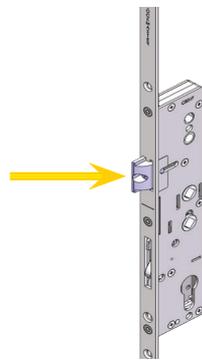

The lock you know and trust

## How to operate the push-in snib feature

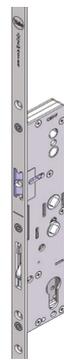

We are pleased to be able to update you with some good news regarding Lockmaster multipoint door lock range.

The Yale Lockmaster 21 is the latest innovation from Britain's best-selling range of multi-point door locking systems. Launched 21 years after the very first Lockmaster lock was released, this latest offering can boast the same reliability and great features you would expect from a Yale Lockmaster.

The new range includes added end-user benefit such as an easy to use push-in snib feature that has been designed specifically to prevent accidental lock-outs.

**Push the latch into the gearbox into its hold-back position to activate the snib feature.**

**Lift the lever to de-activate the snib. The latch will return to its original position.**

For further information on the Lockmaster 21 range visit [www.yaledws.co.uk](http://www.yaledws.co.uk) or contact your Yale Account Manager.
