Maintenance	Yale recommends this product is surface cleaned with a damp cloth only and is kept free from any building materials and debris which could affect the mechanism.
-------------	--

Designed for use on upper sashes

2 location blocks should be fitted as standard. Sashes greater than 1200mm wide should have an additional block fitted centrally on the sash to enhance security

The use of high quality Ø4.8 countersunk screws long enough to fully engage into the profile reinforcement is strongly recommended to achieve optimum performance

Typical application using Location Block only

Typical application requiring Spacer

Colour Variants

White
Grey

Packaging

Boxed in 100's

Material Specification

Reinforced Nylon
