

Mustang Window Locks

Material Spec

Zinc die cast components with zinc passivate finish

Stainless steel parts - 430

Plastic parts - Nylon 66

Maintenance

As with most mechanical devices, locks require periodic maintenance.

Every five years, carry out the following checks:

- a. Check the tightness and security of all fixing screws.
- b. Espag variant only: Check the gasket compression.

Gasket compression can be adjusted via the cam and the use of a 4mm hexagon key. It is recommended that the cam be adjusted as required to maintain the profile manufacturer-recommended gasket compression.

10 Year Guarantee
Delivering peace of mind from the world's favourite lock company.

THE YALE BRAND

Yale is trusted by millions of people every day to keep what's important to them safe. Our innovations have protected their homes, families, and belongings for over 180 years. We have expanded from being a leader in mechanical lock engineering to innovating connected smart locks and homes, because we always make every effort to push the boundaries in a changing world. We were there for your grandparents (and probably theirs) and we'll be there for your children. Today, and every day to come.

Yale's Mustang Window Locks

Slim-Line Security Solutions

Introducing our Mustang Window Locks
– where functionality meets precision.

Our commitment to cutting-edge design and state-of-the-art security takes centre stage with an emphasis on an 'ultra-slim' profile, providing a discreet yet powerful layer of protection.

Trusted every day

Mustang Window Lock Range

Its slim 16mm gearbox design enables it to seamlessly integrate into profiles with the slimmest of sightlines. This versatility makes it the preferred option for both aluminium and timber systems, adapting effortlessly to diverse environments.

Slim-Line Shootbolt

Experience the exceptional functionality of the Mustang Slim-Line Shootbolt, featuring an ultra-slim off-set gearbox that excels in face mounted applications.

Features

- Only five sizes required to fabricate sashes from 350mm to 1400mm, with an extension bar available to achieve even larger sizes or offset handle positions.
- Ultra-slim off-set gearbox design, ideal for fitting into slim glazing up-stands.
- Face mounts onto flat profiles meaning there is no need for Eurogroove.
- Stainless steel construction for ultimate corrosion resistance.
- Fast fit telescopic design which reduces fabrication time, meaning there is no need for cropping.
- High security with excellent compression when tested as part of a window system.
- Can be supplied as a kit, complete with keeps for most profiles.
- Off-set handle extension kit for fabrication of windows with the handle offset from the centre of the sash.

Off-set extension bar - a single extension bar will increase any shootbolt extension by a maximum of 450mm (extra intermediate transmission guides will be required).
