

Always feel safe knowing your home is protected, inside and out.

The Yale Outdoor Motion Sensor will detect any motion outside your home within 12 metres.

Activate the optional pet-friendly feature and customise the detection sensitivity to suit your needs.

Get alerts via the app as soon as motion is detected outdoors like driveways or if someone tampers with the sensor. Ideal to detect any potential intrusions before they take place, so you can feel safe at all times.

The device is weather resistant with dual installation methods: 3M tape (ideal for renters), or fixings.

Trusted every day

Specifications
