

Secure your home
with Postmaster Professional
TS008 Slim Letterplate

The Yale Postmaster Professional TS008 Slim Letterplate combines security, durability, and a sleek design, making it a great choice for your home.

Designed and built to keep your home safe, helping to prevent tampering and unauthorised access. Ideal for any door setup that lets mail pass through, the TS008 Slim Letterplate offers reliable protection and peace of mind.

**Designed to keep
homes safe.**

Protect what matters the most

The **Barrier Protection** system offers enhanced security for your letterbox, featuring dual side shields that automatically extend when the flap opens, blocking access to your door's thumb turn or key from the outside.

With **CombShield technology**, the letterplate blocks any view into your home, stopping intruders from peeking through. Its unique comb-like teeth also prevent fishing tools from sliding around inside, helping protect keys and small valuables from being taken through the letterbox.

- Secured by Design:** Police preferred Secure by Design accredited
- Trusted Standards:** Certified to the TS008:2022 standard, giving you complete peace of mind.
