Yale Bicycle Lock User Manual
YCCL1/8/60/1 & YCCL1/8/120/1

How to reset combination code?
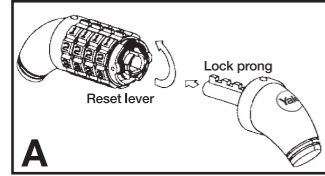

A

Lock prong
Reset lever

B

Lock prong
Reset lever

1. Open the lock using the factory set combination of "5555".

2. Flip the reset lever to the up position (see diagram A) to reset your combination.
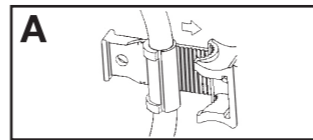

3. Reset the combination making sure the numbers are lined up with the marks on the case.

4. Flip the reset lever to the down position (see diagram B) to complete the setting of the combination, making sure you do not move the number dials.

5. Test the new combination by fully inserting the lock prong into the cylinder hole and read the number.
