

new generation. Global standards.

Yale employs some of the toughest security and performance testing processes in the industry and is a leader in international standards development.

Security strength ratings

The blue level contains the basic security locks rated at least 1-3. The green level includes the general security locks that offer good to high security, rated 4-6. The red level includes the high security locks that offer high to maximum security for all applications certified 7-10.

Corrosion resistance ratings

Accelerated corrosion tests evaluate the padlock's resistance to all types of extreme conditions. The Classic Series padlocks can be used both indoors and outdoors. The Silver Series can be used outdoors and in exposed environments. All locks in the Black Series are suitable for exposed, extreme and marine conditions.

the new Yale padlock range

Yale is proud to introduce the new padlock range. As the world's favorite lock, Yale builds on its unique heritage to continue taking care of people and their favorite things. Yale's new padlock range employs the latest design insights and materials to create the most secure and lasting locking solutions available on the market. The new padlock range is divided into 3 series; Classic, Silver and Black - to easily identify the right lock for every type of challenging situation.

the highest standards

The new Yale padlock range meets the highest security criteria in the world. New smoother forms and finishes not only look and feel good but increase security ratings. State-of-the-art design, new materials and usability knowledge means that each lock has the maximum strength, security, and corrosion resistance for its specific use. All Yale padlocks come with a lifetime warranty.

Black Series

The Black Series introduces a range of maximum high security and high corrosion resistant padlocks. All the locks are rekeyable, offering some of the toughest lasting padlocks on market. They rate between 7 and the maximum 10 on the Yale security rating scale, one of the highest security ratings standards in the world.

Heavy duty body with shackle shroud

The integrated body extension offers extra protection to the padlock shackle.

Stainless steel padlocks

These extremely corrosion resistant stainless steel padlocks are ideal for humid, wet and corrosive environments. Designed to survive the toughest challenges on earth.

Molybdenum steel shackles

Molybdenum steel has already been proven to be the strongest and most durable high performance steel in the defense, space and automobile industries.

Silver Series

The Silver Series introduces a new range of general security, corrosion resistant padlocks with satin chrome finishes and high-grade Boron Steel shackles. These everyday security partners are rated between 4 and 6 on the Yale scale.

Multipack Padlocks Keyed Alike

Multipack padlocks are operated with the same key for convenience.

Classic Series

The original Yale locks offer basic security for indoor and general outdoor use. Tarnish resistant protective finishes with hardened steel shackles maximize security levels. These padlocks rate, at the very least, between 1 and 3 on the Yale scale.

Classic Brass padlocks

Solid brass padlock with smooth round shape and hardened steel shackles maximizing security.
