

SETTING A NEW COMBINATION

This resettable combination padlock is preset at 0-0-0.
(Even though dials may be positioned on other numbers).

To reset the combination:

Step 1

Position the dials to the preset combination 0-0-0 and pull out the shackle.

Step 2

Turn the shackle counterclockwise 90° and press down all the way.

Step 3

Keep holding the shackle down and set the dials to the new combination. **(Do not let go of the shackle while setting the dials)**

Step 4

Release the shackle and return it to its original position. Your lock is now ready to open with the new combination.

Step 5

Test **that** the lock is functioning **with** the new combination before using.
