Postmaster Professional

The highly secure, TS008-accredited letterplate from Yale

- Patent pending design to complement a variety of applications
- Designed to combat common attack methods such as 'fishing'
- TS008:2015 accredited
- Conforms to the requirements of PAS24:2016 and Approved Document Q
- 25 year surface finish guarantee

Helping you stay compliant with the new standards

Your key to PAS24:2016 compliance

All new Secured by Design applications on or after 1st October 2018 will be required to have door sets that are fully certified to PAS24:2016 (Enhanced security performance requirements for door sets and windows in the UK). The updated PAS24:2016 standard references the Door and Hardware Federation (DHF) TS008:2015 security standard. This means that to meet the latest requirement the door will require a TS008 accredited letterplate to comply.

TS008 letterplates are referenced within the Building Regulations Approved Document Q as being shown to protect against various attack methods, including letterplate 'fishing'.

What is 'fishing'?

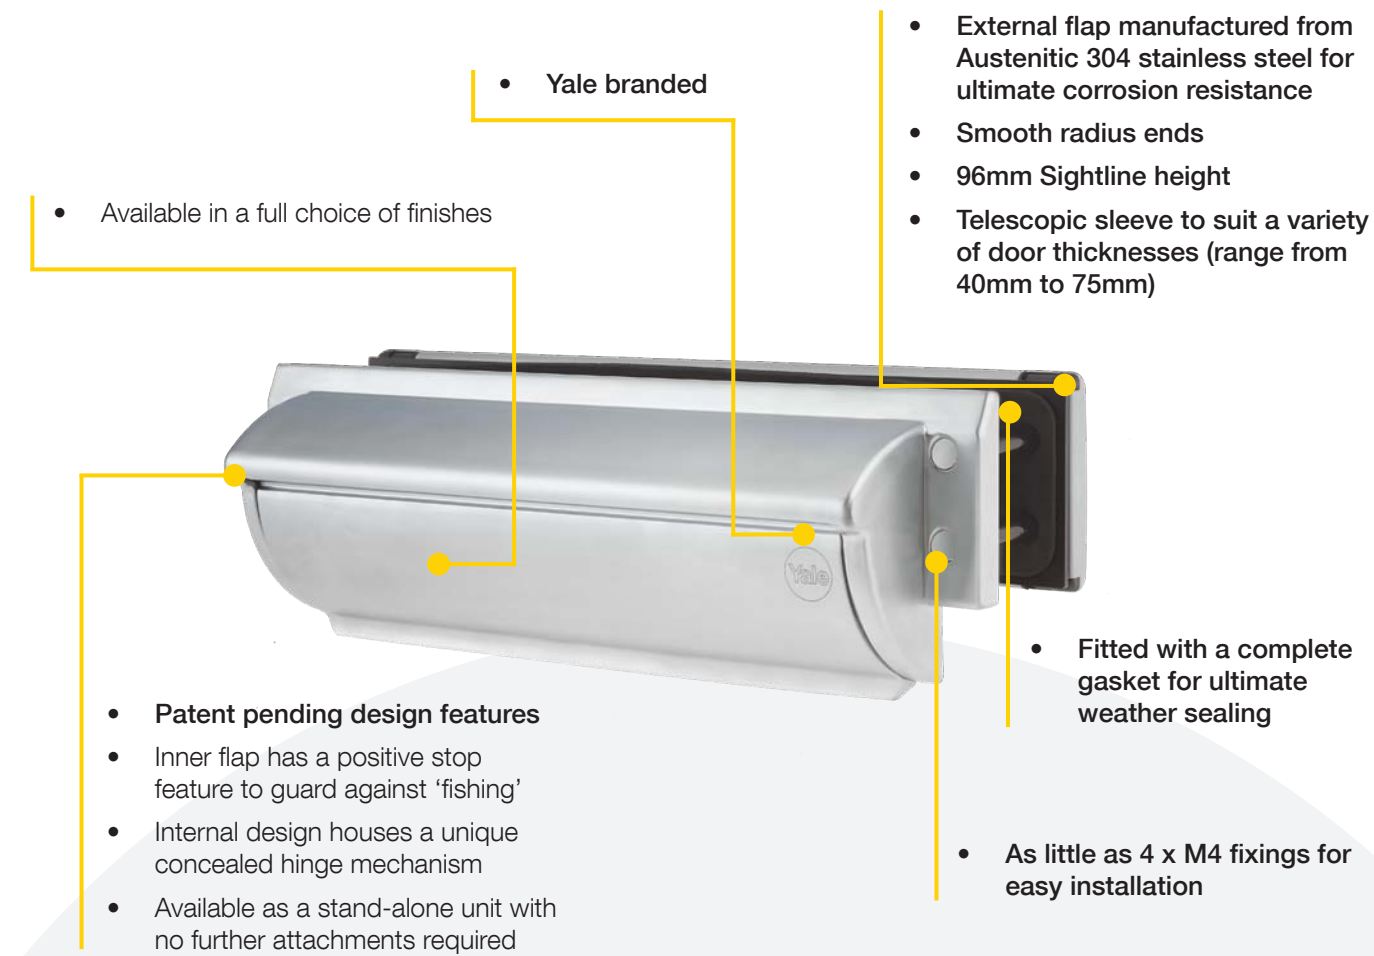

Fishing is a common method of attack whereby items such as keys are removed from the home via the letterplate.

TS008 explained

This technical specification provides a means of evolution against opportunist attack and to prevent contents from being removed from the property. It applies to all letterplate assemblies that allow mail to pass directly through a door or side panel and all slide through boxes that allow mail to pass directly through a door or door side panel.*

The Yale Postmaster Professional TS008 letterplate boasts a long list of features that set it apart from the other letterplate options. With its 96mm sightline height, and telescopic feature allowing it to suit a range of door types and thicknesses, this letterplate offers the utmost practicality and versatility.

Designed with security in mind, the inner flap has a positive stop feature to guard against common attack methods and 'fishing'.

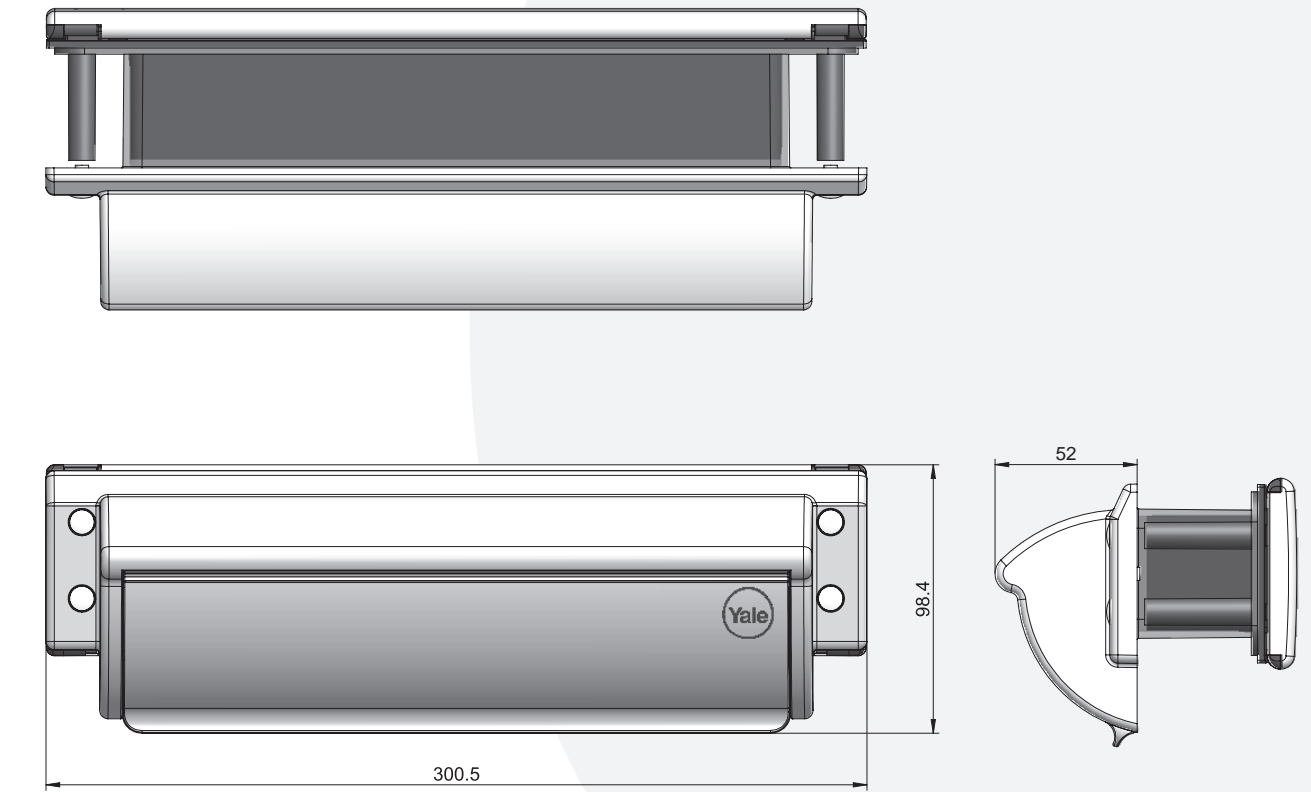

Specification

- TS008:2015 accredited
- Conforms to the requirements of PAS24:2016 and Approved Document Q
- Can be fitted to any PVC, timber or composite door for TS008:2015 compliance
- External unit corrosion tested to BS EN 1670 Grade 5—*tested in excess of 1000 hours NSST*
