

Indoor WiFi Camera

Your eyes on your home.

Yale self-monitored indoor cameras are on hand to let you know exactly what's happening at home, even when you're away, so you never have to miss a moment. Check in to see who's arrived home first, listen and talk back to pets and loved ones, through the Yale View app.

Features

Live Viewing

Set up and control your Indoor WiFi camera via the Yale View app. Check in to see who's arrived home first, listen and talk back to pets and loved ones.

Realtime Conversation

With two-way talk you can talk to those at home when you are away.

Motion Detection Notification

With motion detection alerts you will always be in the know when something has happened. Add an SD card to your camera to capture motion detect events or link to a Yale Smart CCTV DVR for constant back up recording of all activity.

Extended Features:

• In App Control

Set up and control your Indoor WiFi camera via the Yale View app.

• Night Vision

8m night vision activates automatically in the dark, giving you full visibility around the clock.

• Image masking

Ensure you only get alerted when activity happens in a specific area in front of your camera.
