BS EN 1670: Grade 4  
British Standards Institute  
accredited in anti-corrosion  
performance.

Cycle Tested to BS 6375  
Part 2  
Classification EN 12400  
Class - 20,000 cycles

PAS 24: 2016 Compliant\*  
British Standards Institute accredited  
in security.

**Lifetime Security Guarantee\*\***  
All products in our Vertex™ range are  
included within our Lifetime Security  
Guarantee scheme, providing your  
customers with numerous benefits and  
peace of mind.

**10 Year Surface Finish  
Guarantee**  
All of our products are designed to  
withstand all types of weather  
conditions with anti-corrosion  
coatings; ensuring high  
performance all year round.

**Cross Hatch Adhesion Tested**  
A standard test method for measuring  
adhesion by tape test. This test assesses  
the adhesion of film coatings to metallic  
substrates by applying and removing  
pressure-sensitive tape over cuts made  
in the film.

**10 Year Mechanical Guarantee**  
Delivering peace of mind from the world's  
favourite lock company.

ASSA ABLOY

## Yale are proud to offer a range of elegant, decorative hardware for vertical sliding windows.

The Yale Vertex™ range has been notably designed to complement and preserve the traditional aesthetics seen on sash windows, a structure that is most commonly found in British period style homes.

Specifically designed to create products as classical as the windows themselves, the range includes pole rings, sash lifts, latch knobs, travel restrictors, sash locks, and keeps - suitable for both timber and PVCu applications.

Vertex™ hardware is designed, developed and tested in the UK and is covered under the well-established Yale Lifetime Security Guarantee for added peace of mind.

### Tilt knobs

The range includes a heritage tilt knob designed to suit traditional style windows, providing an unparalleled glimpse into past traditions. A contemporary tilt knob has also been designed with the modern home in mind.

The Sash tilt knob has been aesthetically and ergonomically designed to operate and tilt sash windows, providing a robust yet stylish solution for PVCu and timber vertical sliding windows.

### High security sash lock & keep

The sash lock and stainless-steel keep is secured by a combination of 7 fixing points and a Yale branded key locking mechanism; reinforcing its robust design for security and resilience against physical attack methods. The range includes short and long aluminium keep options to suit your application.

A stylish design, with unparalleled security features, the high-security sash lock is PAS24: 2016 compliant and is included within the well-established Lifetime Security Guarantee providing added peace of mind to fabricators, installers and homeowners alike.

### Sash lifts & pole rings

Developed to Yale's exacting standards of quality in both build and finish, the sash lifts and pole rings are aesthetically designed for PVCu and timber vertical sliding sash windows. These integral products are used to lift and pull the sashes up and down in the window.

### Side fix travel restrictor

The travel restrictor has been functionally designed to limit the distance in which the lower sliding sash can move. With security and safety at the forefront of the travel restrictor, it can be released into position using a release pin giving added peace of mind. The non-handed designed sits discretely within the sash without comprising the style and aesthetics of the window.

### Colour options

Available in a variety of traditional colour options, as well as contemporary variations: White, Satin Black, Chrome, Champaign Gold, Silver.

All colours can be mixed and matched with other Yale decorative door and window products to seamlessly bring together modern hardware with classical property features.
