SETTING A NEW COMBINATION

This resettable combination padlock is set to open at 0-0-0, even though dials may be positioned at other numbers

Step 1

Rotate the dials to the set combination and align the numbers with the opening index.

Step 2

Push the Reset Button with a pen or other tool all the way in while turning the dials to the new combination. **Do not let go** of the button while resetting the dials. The lock will now open on the new combination.

Step 3

Test that the lock is functioning correctly with the new combination before using

Keep your combination in a safe and accessible place for future reference.

NOTE:

The Transportation Security Administration (TSA) screeners and airline check-in staff at airports are trained to recognize the Travel Sentry® logo. They understand that baggage with locks displaying this mark are permitted to remain locked.

TSA screeners have access to special codes that allow them to open those locks in the event that the baggage must be opened for inspection. With Travel Sentry® Approved locks the TSA can screen checked baggage faster, without having to break open locks.
